

All,

Starting as early as **Thursday, June 7, 2018**, construction on Minnetonka Drive between 2805 Minnetonka Drive and 3004 Minnetonka Drive will begin.

You may expect the following sequence of activities:

- **Curb and Gutter Spot Repair**
The roadway will remain open during these removals but may be limited to access from one end or the other depending on where the contractor is working. During this construction, street parking and driveway access along Minnetonka Drive will be limited. The contractor will post "No Parking" signs along the street prior to the start of construction. Once these are posted please be sure to relocate your vehicles out of your driveway.
- **Concrete Placement**
Curb and gutter replacement will be poured. Once the concrete is poured, some residents will not have driveway access for approximately five (5) days to allow the driveways to cure and be backfilled.
- **Base Pavement**
The base will be placed in one day and may be driven on immediately.
- **Surface Pavement**
During surface paving the roadway will be closed for approximately one (1) day to allow the pavement to cool.
- **Sod Replacement**

Following the construction of the street, the contractor will begin restoring the sod along the new curb locations. Depending on the time of year and weather conditions, this process may take up to an additional two to three weeks.

Weather permitting this construction process will take approximately **three (3) to four (4) weeks** with additional time for sod replacement. Thank you for your cooperation. If you have any questions or concerns, please contact me at (319)-268-5170
